Explanation.

1. The cards are arranged in an alphabetical order, using the Sire name or last initial letter.
2. In both books the first or left number is that of the type ie, each different name forms a type. The numbers on the right of the dash (—) refer to the No. of the varities - thus A 2—1.2.3 shows that of Letter A type 2 there are three varities and by reference to the book with illustrations we fine that there is one type of the obverse with three varities in the reverse.
3. The different metals are expressed thus C. Copper, B. Brass, L. Lead, N, Nickel. Gs, German Silver. S. Silver. Sp. Silverplated P. Plated. T, Tin, W, White Metal.

4th " Copper is understood to be the metal used unless otherwise mentioned.

5th " Where the same type and variety exist in more than one metal all kinds are given - Thus B. 1 - 2 (B, C) Copper, Brass, & Lead. also A. 25 - 1 (B) = Br

6th " To ascertain by the books if a certain card is in the collection

1st " Take the book of illustrations and make the proper letter look for the Obverse side of the card (ie, the side bearing the name)

If a card of the same name & residence note the Type No.

2d " Refer to the type no in this book & Should there be more than one variety you will find the No. of them given -

3d Having the type No., by it you

can find all of the varities in the book of illustrations, illustrated. Thus - I have a card of "Benjamin & Herrick Albany N.Y." Is it with all of the varities in the collection? I look under B. and find it as type № 5 and four varities illustrated on the first page. Looking in this book I find that there are 7 varities - I now again continue my search and find varities 5 & 6 together, each illustrated and after looking still farther I find № 7 also -
